15	verify the user is able to receive OTP via email or not	user get sign up successful with valid number and invalid password
16	verify that the continue button gets changed to verify the mobile number or not when the user enters the mobile number	user get sign up successful without verifying OTP
17	verify that system redirects the user to the verification window or not when the user clicks on verify mobile number button	user does not get OTP in valid email or mobile number
18	verify that the user is able to receive the OTP via mobile number or not	after verifying OTP user still cannot get successful sign up to amazon
19	verify that after verification of email or mobile number the user gets sign in to amazon	without entering any details user gets sign up successful

Test Case ID	Test Case Name	Test Case Description	Test Pre requisite	Test Data	Steps	Expected Result	Actual Result	Status	Remarks
1	Check Website URL	To test URL on chrome,edge and firefox	Browser, internet and website must be in working condition		1)Paste URL in listed browser and hit enter button	It should open the website	Work as per expected	PASS	
2	Check Website URL	To check URL on mobile device	Browser, internet and website must be in working condition		1)Paste URL in mobile device browser and hit search button	It should open the website	Work as per expected	PASS	
3	Check logo button	To check logo button works or not	Browser, internet and website must be in working condition		1)Paste URL in browser and hit search button 2) Click on logo button	It should open the home page	Work as per expected	PASS	
4	check login button	to check login button works or not	Browser, internet and website must be in working condition		1)Paste URL in listed browser and hit enter button 2) click on login button	It should open login page	Work as per expected	PASS	
5	check sign up or create new account button	to check sign up or create new account button will open registration page or not	Browser, internet and website must be in working condition		1)Paste URL in listed browser and hit enter button 2) click on login button 3) click on sign up/create new account button	It should open user registration page	Works as expected	PASS	
6	check country mobile number code button	to check country mobile number code button works or not	Browser, internet and website must be in working condition		1)Paste URL in listed browser and hit enter button 2) click on login button 3) click on sign up/create new account button 4)click on country code button	It should open various country code list	Works as expected	PASS	
7	check continue button	to check continue button works or not	Browser, internet and website must be in working condition	with valid data	1)Paste URL in listed browser and hit enter button 2) click on login button 3) click on sign up/create new account button 4)click on continue button with valid data	It should open verification page	Works as expected	PASS	
8	check continue button	to check continue button works or not	Browser, internet and website must be in working condition	with invalid data	1)Paste URL in listed browser and hit enter button 2) click on login button 3) click on sign up/create new account button 4)click on continue button with invalid data	It should show invalid error	Works as expected	PASS	
9	check continue button	to check continue button works or not	Browser, internet and website must be in working condition	with only half details data Name: mobile: 9724748955 Email: pass: 123456	1)Paste URL in listed browser and hit enter button 2) click on login button 3) click on sign up/create new account button 4)click on continue button with given data	It should show invalid error of name	Works as expected	PASS	

10	check continue button	to check continue button works or not	Browser, internet and website must be in working condition	with no details Name: mobile: Email: pass:	1)Paste URL in listed browser and hit enter button 2) click on login button 3) click on sign up/create new account button 4)click on continue button with given data	It should show error for all details	Works as expected	PASS	
11	check continue button	to check continue button works or not	Browser, internet and website must be in working condition	with existing user number	1)Paste URL in listed browser and hit enter button 2) click on login button 3) click on sign up/create new account button 4)click on continue button with given data	It should show invalid error of number already exists	Works as expected	PASS	
12	check continue button	to check continue button works or not	Browser, internet and website must be in working condition	with password with 4 digits	1)Paste URL in listed browser and hit enter button 2) click on login button 3) click on sign up/create new account button 4)click on continue button with given data	It should show invalid error of password of less than 6 digit	Works as expected	PASS	
13	check continue button	to check continue button works or not	Browser, internet and website must be in working condition	with password with 6 digits	1)Paste URL in listed browser and hit enter button 2) click on login button 3) click on sign up/create new account button 4)click on continue button with given data	It should open verification page	Works as expected	PASS	
14	check continue button	to check continue button works or not	Browser, internet and website must be in working condition	with password with 10 digits including number, alphabet, special character	1)Paste URL in listed browser and hit enter button 2) click on login button 3) click on sign up/create new account button 4)click on continue button with given data	It should open verification page	Works as expected	PASS	
15	check solve puzzle button	to check solve puzzle button opens puzzle or not	Browser, internet and website must be in working condition		1)Paste URL in listed browser and hit enter button 2) click on login button 3) click on sign up/create new account button 4)click on continue button with valid data 5)click on solve puzzle button	it should start the puzzle	Works as expected	PASS	
16	check solving puzzle	to check solving puzzle open further verification page or not	Browser, internet and website must be in working condition		1)Paste URL in listed browser and hit enter button 2) click on login button 3) click on sign up/create new account button 4)click on continue button with valid data 5)click on solve puzzle button 6) solve the puzzle by clicking asked question	It should open further verification page	Works as expected	PASS
